

## SYSTEM **KAN-therm** Press

### Press female branch tee with steel sleeve

**Description of the product:**

Press female branch tee enables execution of screwed connection, mostly of a branch of main vertical pipeline. Screwed connection can be executed in Systems **KAN-therm** PRESS or PUSH by appropriate male connector or adapter (possibly usage of nipple). Tee has female cylindrical thread – don't join it with male conical threads. Connection should be sealed by tow with sealing compound.
